Maximizing Workplace Efficiency and ROI with Smart Access Control Technology

Smart access control technologies can improve employee productivity and efficiency in the workplace, ultimately leading to increased profitability. These systems include remote access and mobile capabilities, customizable access levels and permissions, and integration with other systems. By reducing the need for manual work and minimizing unnecessary administrative overheads can result in significant cost savings for organizations.

The Pros and Cons of Renters' Bill of Rights: What Housing Providers Need to Know

[Rental Housing Journal](#)

Renters' bills of rights raise questions about the balance between tenants' and housing providers' interests. While tenants demand more protections, landlords worry about unintended consequences. To navigate this complex landscape, providers need to stay informed, engage with tenants, and adopt best practices.

COMING SOON

Upgraded Lockly Access Portal

Improved features, security, convenience, and efficiency on the way.

User Management

Create and manage different access levels for different users, such as residents, maintenance staff, and visitors.

Add or remove users, assign or revoke access rights, and view user activity logs.

Remote Access

Grant or revoke access to residents, employees, or visitors from anywhere, using any device with an internet connection.

Real-Time Monitoring

View real-time monitoring of the smart locks and access control system.

Get an overview of who is coming and going, and any attempted unauthorized access.

Receive alerts, notifications, or activity logs.

Analytics and Reporting

Monitor and track usage patterns, identify potential issues, and make data-driven decisions about access control.

Metrics such as occupancy rates, user activity, and access requests.

Customization

Customize access control settings, create unique access codes, and set up automated access schedules

Meet the specific needs of the property managers and residents.

Lockly Access Portal, powered by Lockly OS, the smartest way to manage all of your Lockly access points across all of your properties.
